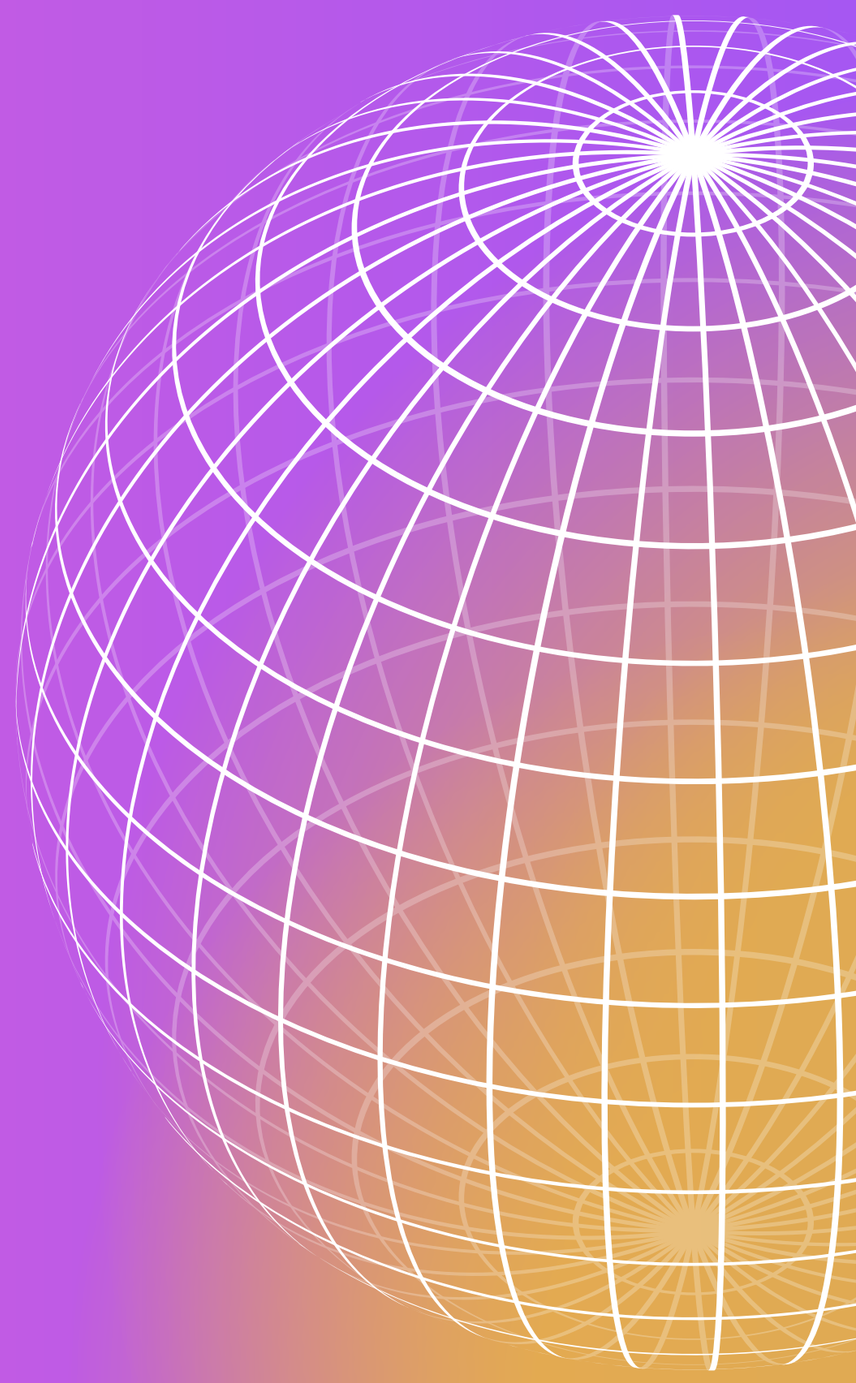
PINKY TOKEN

WHITEPAPER



PINKY TOKEN is a blockchain tech startup founded in 2022, with the goal of unlocking social impact for everyone to save our little friends from street

Pinky Token is founded in İstanbul,2022

Our Story

We are a team of dreamer builders who want the best for everyone especcialy our little friends who live in the street . We know when we come together for a common goal we can do more .

Our Vision § Mission

Pinky Community are trying to digitilaze the charity. Pinky Token, which we are in the process of working, is an organization that will be launched for the first time in Turkey for stray cats. This project will create a very good effect for all animal lovers who strive for street animals.

Capital follows value, not the other way around. The creator pouring their soul out gets what they put in, and a worthy cause gets a piece too.

Human connection drives us, and the technology we build should unite rather than divide. Gone are the days of profitseeking algorithms making us hate each other for clicks

Zero mining, and a carbon-negative footprint. We’ll leave the planet better than we found it. It’s that simple.

PRODUCT DEVOLOPMENT

Pinky Listings

After Launching our project. There will be agreements for listings in global blockchain markets.

PinkyApp

After Early Bird Section is over we are gonna launch PinkyApp to see the donations made , the steps we are following

PinkyGames

There will be Flappy Pinky Game to play&earn .Earned token's donation will be covering with **(?)**

Pinky NFT

After 50% of the tokens are sold there will be 50 pieces of NFT pack

Pinkyland

Last but not least in Decentraland there will be Pinky to greet you!

Pinky and the Sisters!

When the steps are over, there will be more projects to keep the good in the world going.

Hub Tech

With the community vote platform we empower the community to steer key activities and funding opportunities. By connecting their wallet, community members are given voting benefits.

Our Forum is the place to be for our community to be informed & engaged with our team to stay up to updated with current statuses, suggestions on how you can help contribute to the project.

The Token Tracker is a webapp on our site that allows community members to stay up to date with their token rewards.

Binance Smart Chain (BSC) is a blockchain network that runs in parallel to the Binance Chain. In contrast to the Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The Binance Smart Chain offers our community the added interoperability of facilitating their transactions through Ethereum- based wallets, such as MetaMask. An added advantage of issuing Elongate tokens on the BSC is that it offers our community an affordable blockchain experience through smaller transaction fees compared to the Ethereum Network.
